Re: Proposed Norway Point Improvement Plan

The Corporation of The Township of Lake of Bays
Madam Mayor and Councillors

I am contacting you to express my objection to the Proposed Improvement Plan for Norway Point Park. For several years my family and others have had the privilege of swimming, picnicing and socializing at this Park. I see this threatened by this Proposed Plan. It needs to be preserved for future generations to come.

To provide 17 Island Cottagers with exclusive parking and boat slips is unjust and undemocratic. It will not stop there. More parking and slips will be required by others and it will go on and on. This Proposed plan only benefits the Island Cottagers. Secured parking all summer and lets not forget what it will do for property value for resale. For the rest of us it means 12 hour parking only, more traffic, more water and air pollution, more garbage, and a full parking lot in view of the swimming/picnic area which right now is nice and quiet and out of sight to the goings on. Once this is gone we will never get it back for basically you are selling Public Property.

There are facilities in the area that have available space and would be more than happy to accommodate the Islanders needs. This would be good for ALL and solve all the problems.

Regards
Pat Foot
